Career Objective:

Dedicated and detail-oriented Software Test Engineer with 2 years of experience in quality assurance and testing. Proven ability to identify software defects and ensure the delivery of high-quality products. Seeking opportunities to contribute my skills to a dynamic team and continue to grow in the field of software testing.

Professional Experience:

QA Engineer

MachineHack GenerativeAI by AIM | Bengaluru | 06/2024 – Present

Profile Summary:

- Perform thorough testing of web-based applications to ensure quality and functionality.
- Develop, execute, and maintain test cases and scripts.
- Enhance testing efficiency using automation frameworks like Playwright.
- Identify, document, and track software defects with Jira.
- Collaborate with development teams to resolve issues.
- Engage in the full software development life cycle (SDLC) from requirements gathering to deployment.
- Conduct testing for web and mobile applications as needed.
- Clearly document testing processes, results, and defects.
- Stay current with industry trends and technologies to ensure best practices.
- Successfully lead and inspire cross-functional teams to achieve shared goals through effective communication, strategic coordination, and collaboration.
- Utilize agile methodologies to support team delivery of quality software solutions.
- Execute both automated and manual tests to ensure comprehensive test coverage.
- Optimize software testing systems to improve performance and efficiency.
- Design test cases in collaboration with development teams based on project requirements.
- Run manual and automated test scripts to identify and document defects, using various testing tools/frameworks.
- Provide insights into testing progress and challenges during sprint planning and daily standups.
- Conduct functional, regression, integration, and end-to-end testing to ensure software stability and reliability.
- Create and maintain test documentation, including plans, cases, and defect reports.
- Deliver detailed bug reports and collaborate closely with developers for timely resolution.
- Contribute to the continuous improvement of testing processes and methodologies for greater efficiency and effectiveness.
- Exhibit excellent communication skills in reporting bugs and working with developers to resolve issues promptly.

Role and Responsibilities:

- Test Planning and Strategy
- Test Execution
- Defect Management

- Utilize automation frameworks such as Playwright or similar platforms to create and maintain automated test scripts and enhance testing efficiency by integrating automated tests into the CI/CD pipeline.
- Collaboration
- Documentation
- Continuous Improvement
- Quality Assurance
